

User Documentation

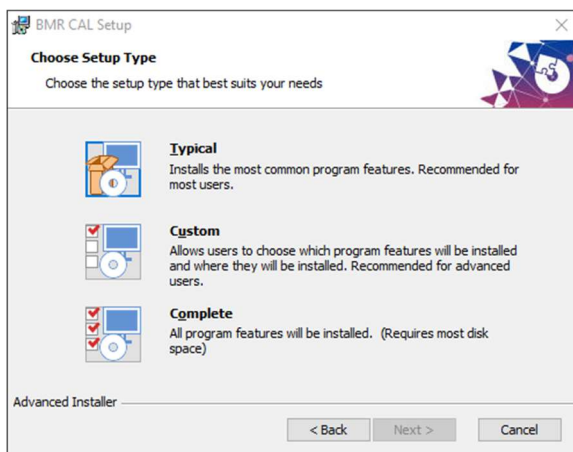

Installation Guide - Including .exe

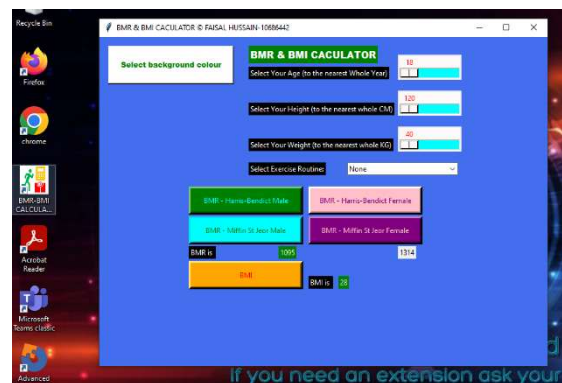

1. Plug the USB provided into your PC & open the “BMR-BMI CALCULATOR” folder.

2. Locate & open the “ BMR-BMI CALCULATOR” Windows Installer File, follow the setup wizard.

3. On the “Choose Setup Type” screen, select “Typical” & click “Next” to continue with the setup wizard.

4. Once the installation process is complete, the application should launch ready for use & a desktop icon for the EXE should have been created for easy access.

User Guide – Including Error Messages & Recovery Action

This is the main screen you will be greeted with when you open the application, this is where all the data is input, calculations selected & results are displayed.

The screenshot shows the main interface of the 'BMR & BMI CALCULATOR'. It features a blue background with a white sidebar on the left containing a 'Select background colour' button. The main area has input fields for 'Select Your Age (to the nearest Whole Year)' (set to 18), 'Select Your Height (to the nearest whole CM)' (set to 120), and 'Select Your Weight (to the nearest whole KG)' (set to 40). Below these is a 'Select Exercise Routine' dropdown menu set to 'None'. There are four colored buttons for calculation methods: 'BMR - Harris-Benedict Male' (green), 'BMR - Harris-Benedict Female' (pink), 'BMR - Mifflin St Jeor Male' (cyan), and 'BMR - Mifflin St Jeor Female' (purple). At the bottom, there are two orange buttons labeled 'BMR is' and 'BMI is', followed by a vertical green bar.

How To Perform A BMR Calculation

1. Set your age (in years) with the first scale slider by moving it toward the right. In this example the age has been set to 37.

This screenshot shows the calculator interface with the age slider adjusted to 37. A red circle highlights the '37' value on the age slider, and a red arrow points from the first step of the instructions to this circle. All other input fields and buttons remain the same as in the previous screenshot.

2. Set your height (in cm) with the second scale slider by moving it toward the right. In this example the height has been set to 175.

This screenshot shows the calculator interface with the height slider adjusted to 175. A red circle highlights the '175' value on the height slider, and a red arrow points from the second step of the instructions to this circle. The age is still set to 37, and all other elements are unchanged.

- Set your weight (in kg) with the third scale slider by moving it toward the right. In this example the weight has been set to 70.

The screenshot shows the 'BMR & BMI CALCULATOR' interface. The 'Select Your Weight (to the nearest whole KG)' slider is set to 70, which is circled in red. Other inputs include Age: 37, Height: 175, and Exercise Routine: None. Below the inputs are buttons for 'BMR - Harris-Benedict Male', 'BMR - Harris-Benedict Female', 'BMR - Mifflin St Jeor Male', and 'BMR - Mifflin St Jeor Female'. At the bottom, there are buttons for 'BMR is' and 'BMR With Exercise Is'.

- Select your exercise routine from the drop-down menu. In this example the exercise chosen was Moderate.

The screenshot shows the 'BMR & BMI CALCULATOR' interface with the 'Select Exercise Routine' dropdown menu open. The 'Moderate (3-5 Days/Week)' option is selected and circled in red. The weight remains at 70 kg. Other inputs are Age: 37, Height: 175, and Exercise Routine: None. Below the inputs are buttons for 'BMR - Harris-Benedict Male', 'BMR - Harris-Benedict Female', 'BMR - Mifflin St Jeor Male', and 'BMR - Mifflin St Jeor Female'. At the bottom, there are buttons for 'BMR is' and 'BMR With Exercise Is'.

- Select your calculation/gender type by clicking the relevant button & two BMR results should appear one for standard BMR & other for BMR with exercise. In this example the Harris-Benedict calculation for males was chosen.

NOTE: For other BMR calculations repeat step 1-4 & at step 5 chose the desired calculation/gender

The screenshot shows the 'BMR & BMI CALCULATOR' interface with the 'BMR - Harris-Benedict Male' button selected and circled in red. The exercise routine is 'Moderate (3-5 Days/Week)'. The weight remains at 70 kg. Other inputs are Age: 37, Height: 175, and Exercise Routine: Moderate. Below the inputs are buttons for 'BMR - Harris-Benedict Male', 'BMR - Harris-Benedict Female', 'BMR - Mifflin St Jeor Male', and 'BMR - Mifflin St Jeor Female'. At the bottom, there are buttons for 'BMR is' and 'BMR With Exercise Is'. The results shown are BMR is 1654 and BMR With Exercise Is 2564.

How To Perform A BMI Calculation

1. Set your weight (in kg) with the third scale slider by moving it toward the right. In this example the weight has been set to 70.

The screenshot shows the 'BMR & BMI CALCULATOR' interface. The 'Select Your Weight (to the nearest whole KG)' slider is set to 70, which is circled in red. Other inputs include Age: 37, Height: 175, and Exercise Routine: None. Below the inputs are buttons for BMR calculations (Harris-Benedict and Mifflin-St Jeor for both male and female) and buttons for BMR and BMI results. The BMI button is highlighted in orange.

2. Set your height (in cm) with the second scale slider by moving it toward the right. In this example the height has been set to 175.

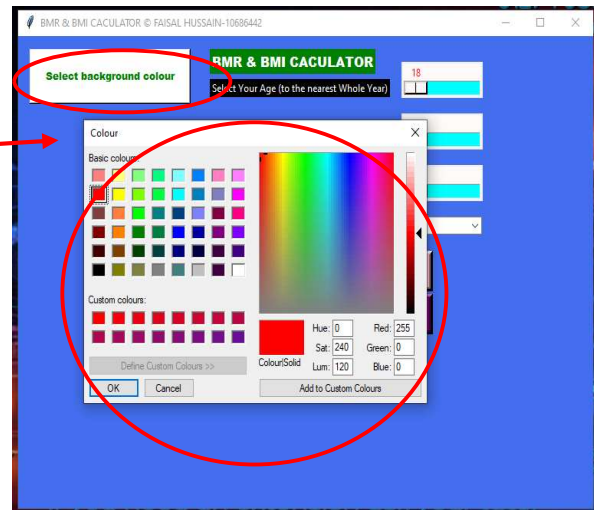

The screenshot shows the 'BMR & BMI CALCULATOR' interface. The 'Select Your Height (to the nearest whole CM)' slider is set to 175, which is circled in red. Other inputs include Age: 37, Weight: 70, and Exercise Routine: None. The BMI button remains highlighted in orange.

3. Click the BMI button to calculate, BMI & weight category results should appear.

The screenshot shows the 'BMR & BMI CALCULATOR' interface after clicking the BMI button. The BMI button is now highlighted in green, and the results are displayed: 'BMI is 23' and 'Your BMI category is HEALTHY WEIGHT!'. These results are circled in red. The input fields remain the same as in the previous steps.

How To Change The Background Colour

1. Click on the on the select background colour button, a colour pallet should appear, chose a colour & click ok. For this example, red was chosen.

2. The background has changed to red.

Error Messages & Recovery Actions

Due to the way the application was developed & rigorously tested, there no error messages. The only recovery action that may need to be taken is closing the program & restarting it if becomes unresponsive. You find that you cannot set the desired number for the age, height & weight scale sliders, in this just click to left side of the slider to decrease the number by 1 or click on the right side to increase it by 1.
